*If using 12" sidelights, subtract 2" from the opening width for a single sidelight, and 4" for double sidelights.

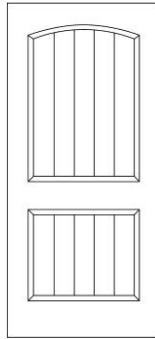

**Brick dimension is measured from outside edge of brick mould on door unit.

6'6" units subtract 2" from height, 7'0" units add 4" to height and for outswing doors (with bumper sills) subtract 5/8" from overall height of opening.

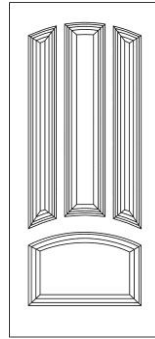

Architectural Collection

JELD-WEN's Architectural Collection utilizes an exclusive technology to create the most realistic woodgrain appearance in the industry. Starting with a hand-crafted wood door where each piece of wood is carefully selected, an exact replica of that door is created. Every unique and intricate characteristic from the original wood door is transferred to the final product. Like real wood, the grain is captured in the surface and not above it . . . so real you won't be able to tell the difference.
